

HDL KNX/EIB series products of Multi function Motion Sensor is fully complying with European safety standards and KNX association protocol. It is a multi function Movement detect sensor, embedded with function of Temperature detecting, LUX detecting, Master & Slave control, Logic control etc. It has the function for sending of variety data points, can be used to control many different types of KNX devices.

HDL KNX / EIB sensors can be used in many different applications, together with other KNX devices.

HDL provides application solutions for the Smart Home and Building Control applications with the World leading level, Green, Environmental Protection, Energy Conservation, for the purpose of creating a high quality of life as the ultimate goal of intelligent.

Product function:

- 1-Switch
- 2-Staircase light
- 3-Master-slave control
- 4-Curtain
- 5-Shutter
- 6-Scene control
- 7-Absolute dimming
- 8-Temperature
- 9-Logic control
- 10-Combination control
- 11-Status report

Power parameter:

Operating voltage(supply by the bus) 21-30 V DC
 Current consumption EIB / KNX(operate) < 20 mA
 Static current:< 5 mA
