

HDL KNX/EIB Easy panel series products are fully comply with European safety standards and KNX association protocol, with moderate intensity of Rubber Keypads, Laser Engraving, and Back-Ground Light, also with variety of panel materials optional.

It has Built-in mini infrared receiver, with the function of sending the variety data points at the same time that can simultaneously control many different types of KNX equipment, and also it has the function of Scene DimmingControl.

HDL KNX / EIB Easy panel series products are widely used in various occasions with other KNX needed equipment ; HDL provides application solutions in the Smart Home and Building Control applications with the World leading level, Green, Environmental Protection, Energy Conservation for the purpose to create a high quality of life as the ultimate goal of intelligent.

### Power parameter:

Operating voltage(supply by the bus) 21-30 V DC,  
Current consumption EIB / KNX(operate) < 20 mA

### Product function:

- |                       |   |
|-----------------------|---|
| 1-Switch control      | 10-1 bytes control  |
| 2-Dimming control     | 11-2 bytes control  |
| 3-Curtain control     | 12-4 bytes control  |
| 4-Shutter control     | 13-bytes(String) control  |
| 5-Flexible control    | [ 1-IR Remote control<br>2-Dimming button LED brightness<br>3-Dimming background LED brightness<br>4-Sleep modem for LED<br>5- Button locked single or together via BUS<br>6 -Trigger button via BUS<br>7-Support wide range data point ] |
| 6-Scene control       |   |
| 7-Sequence control    |   |
| 8-Percentage control  |   |
| 9-Combination control |   |
