CASE STUDY

Along with powerful access controllers and other hardware accessories, GeoVision offers a series of complementary access control software including the GV-ASManager, GV-ASWeb, GV-ASRemote, and GV-Access mobile applications to provide the flexibility and scalability for both local and remote access control.

The diagram above shows how the access control software can be set up for a retail chain. GV-ASManager can be installed in local PCs of the chain stores and the headquarters can remotely monitor the chain stores using GV-ASWeb or GV-ASRemote. Using GV-Access mobile applications, up to 5 GV-ASManagers can be accessed from a mobile device.
